Timeless Design.

When designing the **PERENE** the concept went through thousands of product focus groups and creative agencies – before we arrived at... a ball. Ok, we jest, but the **PERENE** is indeed a classic design. And it's not just any ball. It's considered and focused engineering makes it a breeze to customise for your project – suspended, rod mounted, this size, that size, this colour. Just simple, honest, beautiful and basic design that'll elevate your space.
