YEAR

IP20

RoHS

1

Take a deep breath. Now remove the diffuser. Drill holes in the wall the same distance as mounting barrels. Use a screw to mount Part A to the wall. Don't mount screws to center barrel, you'll use that to feed the cable later.

2

Place the profile onto Part A and align with the holes and screw in Part B.

3

Feed the power feed cable through the center mounting barrel.

4

Stick down the LED tape carefully (they are fragile!)

5

Reassemble the diffuser. How cool is it when it just clicks in?

6

Let loose.
